Beastrom Ranch

Welcome to our 34th Annual Bull Sale,

We would like to offer a special thank you to those of you who have purchased bulls from our program and have confidence in our genetics.

The weather was very dry last spring but the rain came and the cattle performed very well. The bulls were weaned in September and have done well throughout the winter months. This set of bulls is as uniform as any group we have offered and the disposition along with the performance has surpassed our expectations.

We have an exceptional set of red bulls in the offering this year, both purebred and Balancer® bulls are loaded with volume, fleshing ability and muscle mass while maintaining eye appeal. The black bulls we have put together are very uniform, some offer calving ease and some offer performance, but they all are soft-made, soggy-middled cattle that offer power and performance. Overall this set of bulls is one that we are truly proud to offer for sale.

Over the past several years we have utilized more embryo transfer work and it has resulted in more front end bulls and females. With that in mind, Barb and I have reduced numbers in our cow herd and increased the number of donors in our embryo transfer program. Our commitment is to make genetic changes and meet our goals more quickly. Our goals are to maintain the performance in our cow herd and increase carcass traits such as marbling, ribeye area and tenderness.

Please join us on February 24th at the ranch to evaluate the bulls. If you are unable to attend the sale in person, the bulls are available for viewing at the ranch any time and videos will be available at www.beastromranch.com or at www.dvauction.com. Remember we guarantee all sight unseen purchases.

See you for lunch at 11:30 a.m. CST.

Thank you,

Jim Beastrom

The sale will be conducted with a live auction, however, the sale cattle will not be run through the ring. They will be shown on three large video screens during the sale. All lots are available for inspection anytime at the ranch and will be on display in the pens the day of the sale. Videos and performance data on all sale lots available at www.beastromranch.com. Absentee bidders who wish to utilize the Internet may bid online at www.dvauction.com. Please register online at least 24 hours prior to the sale. Call 402-474-5557 for technical support.

34th Annual Bull Sale

Monday, February 24, 2014 • 1:00 p.m. CST
At the Ranch, Pierre, SD

SALE LOCATION: AT THE RANCH, FOUR MILES NORTHEAST OF PIERRE, S.D.

20453 CENDAK RD, PIERRE, SD 57501

A COMPLIMENTARY BEEF LUNCH WILL BE PROVIDED STARTING AT 11:30 A.M.

GENERAL SALE INFORMATION

Sale Location Directions:

From West: 1.4 miles east of Triple M Truck Stop on Highway 14/83, then turn north on Cendak Road for 0.5 miles.

From East: 11.9 miles west of Highway 14/83 junction west of Blunt, then turn north just after mile marker 235 on Cendak Road for 0.5 miles.

Accommodations: Ramkota Inn, 605-224-6877, livestock trailer accessible.

Herd Health: All cattle will sell with proper health papers.

Sight Unseen Policy: We will guarantee the complete satisfaction of all sale lots purchased sight unseen. All bids will be handled with the highest appropriateness and confidentiality.

Volume Discount: 5% on 5 bulls; 10% on 10 bulls.

Semen Interest: We will be retaining a 1/3 semen interest in all sale bulls, unless otherwise stated.

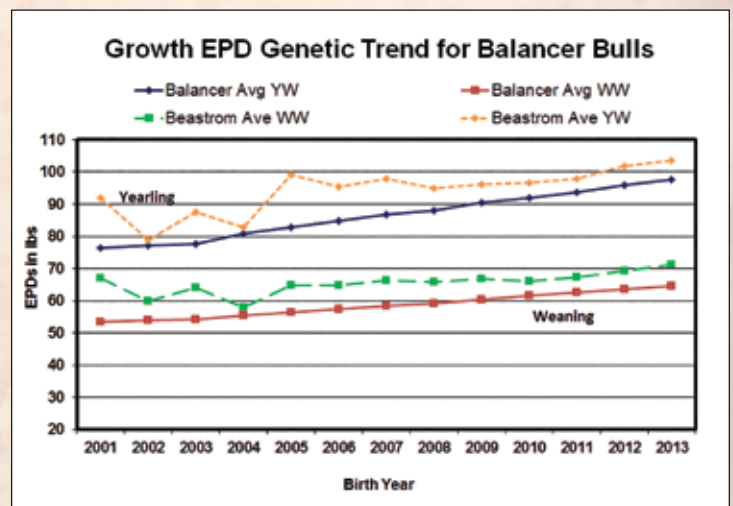

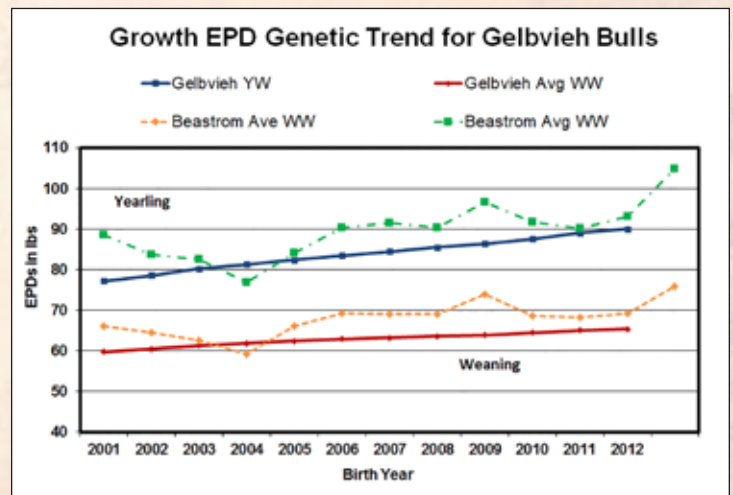

Trucking: All bulls will be delivered free of charge in South Dakota. Arrangements can be made for delivery anywhere in the country. Buyers hauling their bulls on sale day qualify for a \$50 discount on each bull purchased.

Liability: People that attend this sale do so at their own risk, we are not responsible for accidents.

Terms and Conditions: Terms are cash or check, and settlement must be made sale day before the cattle leave the ranch. All cattle sell under the terms and conditions suggested by the American Gelbvieh Association. A copy of these can be obtained from the AGA or through Jim Beastrom.

GET MORE GROWTH WITH BEASTROM BULLS

The charts below compare the average weaning weight and yearling weight EPDs of our bulls against the Gelbvieh and Balancer breed averages for each year. As you can see Beastrom bulls exceed breed averages for weaning weight and yearling weight EPDs. Whether you sell your calves at weaning or yearlings, our bulls will give you more pounds, equalling more profit!

Lot 1 BEA 301A

AMGV1257669 Polled Red

BD: 03/21/2013 PB94 BW: 88 WW: 787

RID R Collateral 2R (JCGR BAR GT Flashback 410M ET)

BEA PASSION 001X ET

BEA Ella ET (BEA Silverado)

BEA Polled Perfection (DDF Electric Black)

BEA 9072W

BEA 7001T ET (LNR Traitmaker)

EPD:	9	3.2	69	97	33	67	10		-0.28	32	0.47	-0.18	-0.09	5.25	32.50

BEA 301A ranks in the top 15% for calving ease of daughters, the top 25% for milk and yield grade and the top 30% for rib eye area among Gelbvieh bulls, he also has a big birth to weaning spread with an adjusted weaning weight of 787 lbs., with a ratio of 112.

A herd sire in the making, we have not been this excited about a purebred bull since his sire BEA Passion 001X ET.

BEA 301A has a strong skeletal structure combined with muscle mass and volume while maintaining a soft attractive look.

He is out of a moderate framed cow that consistently raises high performing herd bulls that are both well balanced and well received. (BEA 143Y is a maternal brother to 301A and hard working herd bull that is currently working for Lynn Hennings in Iowa.)

BEA 301A is Homozygous Polled and we are retaining 1/2 semen interest.

Do not miss the opportunity to invest in these proven genetics.

Lot 1

BEA 9072W • Dam of Lot 1

Lot 2 BEA 377A

AMGV1270522 Polled Red

BD: 03/18/2013 PB94 BW: 85 WW: 790

RID R Collateral 2R (JCGR BAR GT Flashback 410M ET)

BEA PASSION 001X ET

BEA Ella ET (BEA Silverado)

EPD:	8	3.1	72	104	33	69	10		-0.25	35	0.46	-0.15	-0.08	9.96	36.31

BEA 377A ET is an exciting herd bull prospect that offers balance, volume and muscle mass.

He offers big time performance with an actual weaning weight of 700 lbs (adjusted of 790 lbs)

Sired by BEA Passion 001X ET the 2011 Gelbvieh Futurity Champion and the 2011 National Champion bull. Passion sired

calves are loaded with natural fleshing ability, a big sound foot, performance, muscle mass and are very docile.

BEA 377A's dam BEA 3047N may be the highest volume cow we have ever raised. She is sound, easy fleshing and from a cow family that offers consistency and longevity. This is a rare genetic package and 377A is the kind that has all the right pieces to be a great producer.

Lot 2

BEA 3047N
Donor Dam of Lot 2 & 3

Lot 3 BEAS 3900A

AMGV1270660 Polled Red

BD: 03/19/2013 PB94 BW: 98 WW: 811

RID R Collateral 2R (JCGR BAR GT Flashback 410M ET)

BEA PASSION 001X ET

EPD:	8	3.1	72	104	33	69	10		-0.25	35	0.46	-0.15	-0.08	9.96	36.31

3900A combines one of the best donor females and young herdsires from our program. Passion 001X ET is the former National Champion and Breeder's Choice Futurity winner and 3047N is an exceptional female from the heart of our herd. She is deep bodied, broody and well uddered.

3900A had an adjusted weight of 811 lbs., and a nearly

3.5 lb. average daily gain at weaning. His EPDs rank high in weaning weight, yearling weight, milk and total maternal categories.

If you're looking for a red purebred bull, we feel that 3900A offers both exceptional genetics and performance that will enhance any herd.

Lot 4 **BEA 322A**

AMGV1257128 **Polled Red**

EPD: 6	3.6	83	114	37	79	10		-0.18	42	0.35	-0.27	-0.08	-3.14	38.79

BEA 322A ranks in the top 10% for milk, weaning weight, yearling weight, carcass weight and feedlot merit among Gelbvieh bulls.

He has an adjusted weaning weight of 806 lbs., with a ratio of 114.8.

BEA 322A is a genetic outcross to most pedigrees in the Gelbvieh breed and combines two of the most consistent and

powerful cow families on the ranch. BABR 101Y is a past sale favorite that we incorporated into our AI program for his overall balance, power and strong maternal traits.

His dam BEA 7007T is a littermate to BEA Ella 7000T (the donor dam to BEA Passion, BEA 063X and BEA 158Y to name a few) 7007T's sons on average wean off at 790 lbs. She is truly a performance cow.

Lot 4

BEA 7007T • Dam of Lot 4

Lot 5 **BEA 358A**

AMGV1270517 **Polled Black**

BD: 02/19/2013 PB94 BW: 88 WW: 790

BEA Silverado (LWHF Fearless)

BABR WHO DONE IT

BABR Hott Toddy (BEA Maxim)

BEA 801U ET (LNR Traitmaker)

BEA 1040Y

BEA 8205U (BEA Silverado)

BEA 358A is out of a performance driven, powerful, heavy milking first calf heifer and has an adjusted weaning weight of 790 lbs., with a ration of 111.

He is a long bodied, growthy bull that will add mass and performance to your calf crop, which means more

pounds at weaning.

BEA Backtrack daughters are heavy milking cows that offer big performance numbers in their offspring and are hard working cows.

Lot 5

Lot 6 **BEA 319A**

AMGV1257048 **Polled Black**

CE	BW	WW	YW	MK	TM	CED	ST	YG	CW	RE	MB	FT	CV	FM
EPD: 7	3.8	86	118	26	69	6		-0.09	44	0.40	-0.05	-0.04	20.25	41.03

BEA 319A is a purebred bull with a big birth to weaning spread (adjusted weaning weight of 820 lbs., with a 112 ratio).

He ranks in the top 10% for carcass value, the top 5% for yearling weight and the top 4% for weaning weight among Gelbvieh bulls.

319A's dam LLJ 16S comes from a cow family that always make

great females, it is a very maternal driven cow family and several daughters are in production in other herds across the country and several have found their way to our ET program at the Beastrom Ranch.

Sired by BVLK Buckingham, a moderate framed bull that is loaded with red meat. We purchased him for his muscle mass and big rib eye (18 in.).

LLJ 16S • Dam of Lot 6

Lot 7 BEA 303A

AMGV1257086 Polled Black

BEA 303A ranks in the top 5% for weaning weight and the top 25% for carcass weight and milk among Gelbvieh bulls.

He has an adjusted weaning weight of 748 lbs., with a ratio of 106.5 and is sired by a Gelbvieh bull that we chose to use to add pounds and performance.

BEA 303A's dam has been a herd bull producing machine averaging 716 lbs. on six sons. She has a flawless udder structure and has beautiful phenotype.

This could be a very exciting outcross herd bull in the making.

Lot 9 BABR 3403A

A purebred bull that is an outcross to most pedigrees in the Gelbvieh breed.

He ranks in the top 10% among Gelbvieh bulls for weaning weight, yearling weight, carcass weight, feedlot merit and ranks in the top 20% for rib eye area.

BABR 3403A's dam is a daughter of BABR Secret Crush

who is also the donor dam of the 2013 Breeders Choice Balancer Futurity Champion BABR Secret Brand 2100Z and the 2007 Reserve National Champion Gelbvieh female GLWG Diva 38R.

This is a bull that offers both growth and performance, he has an adjusted weaning weight of 795 lbs., with a ratio of 113.2

BEA 330A is another high volume, powerful son of BEA Passion 001X ET that is loaded with muscle mass in combination with a soft soggy look.

He ranks in the top 3% for weaning weight, the top 4% for yearling weight and the top 10% for total maternal and

feedlot merit among Gelbvieh bulls.

330A is out of a powerful cow that always adds performance and growth to her progeny.

If you want to add pounds at weaning, these Passion sired bulls will help to achieve that goal.

BEA 300A ranks in the top 3% for weaning weight, the top 15% for fat thickness, yearling weight and total maternal and the top 20% for feedlot merit.

300A is a member of our 2014 NWSS show string and this guy has been a standout since he was 2 months old. We loved him from the beginning and he has not disappointed us once.

He is sired by CTR Sandhills 0065X, a Balancer bull whose progeny have created a lot of excitement in the Gelbvieh breed.

300A has a massive top, a stout made skeletal structure and is loaded with volume and rib shape.

BEA 300A is out of one of the most powerful and consistent cow families on the ranch, his grand dam BEA 5033R has always raised cattle that meet industry demands.

He is homozygous polled and we are retaining 1/2 semen interest.

3806A is special genetic opportunity. His dam is out Miss Rhonda 34P66, one of the most consistent donors from the heart of our herd. Miss Rhonda has done a tremendous job for us. Her replacement females are thick, deep bodied, good uddered and easy keeping. Her bulls are stout, strong topped, soggy bellied and always sell well. We feel that 3806A is

another great example of the consistent quality that the Miss Rhonda females offer.

This 75% Gelbvieh red bull has a big weaning weight and ranks in the top 15% for weaning and yearling EPDs.

3806A has all the makings of a great herdsire.

3812A is a moderate framed, structurally sound and well balanced bull.

His dam X497 is a beautiful female from the River Hills Angus program that has done very well for us. She's a high volume, easy fleshing female with a great udder.

We have had tremendous results from crossing our Angus females with Gentleman Jack. He adds power and stoutness to his calves.

3815A is bull that has really excelled since weaning. He adjusted at 711 lbs., and gained over 3 lbs. a day at weaning and continues to gain and hold his own against the older bulls.

We have retained several replacement females out of his dam 5011R who is a wonderfully made deep bodied Angus female with lots of hip.

3815A is a bull with plenty of depth and thickness and a big hip.

3813A comes from X185, a great Angus female we purchased from River Hills. Her bull from last year, BEAS 2800Z, was a sale topper that we collected semen on and AI'd many of our heifers to. We are very excited to see his first crop of calves this spring. We have been so impressed with X185 thus far, that we have decided to flush her.

3813A had an adjusted weight of 761 pounds and average daily gain of 3.23 pounds at weaning making him one of our high indexing bulls. He ranks in the top 3% or better in weaning and yearling weight EPDs. He also has great total maternal, rib eye area and feedlot merit values.

3813A's future is full of potential.

3326A ranks in the top 4% for fat thickness and the top 20% for yield grade and weaning weight among Balancer sires. He has an adjusted weaning weight of 771 lbs., combined with a moderate birth weight.

He is a long bodied, soft sided masculine son of Crossfire. Crossfire sired cattle are well balanced, heavy muscled and will

add performance and carcass genetics to your calf crop.

3326A is out of a moderate framed, easy fleshing Pay Stub daughter that consistently raises great calves. The average weaning weight on her bull calves is 755 lbs.

Barstow Cash AMAN17145326

Cash took the 2012 spring bull sale season by storm when he sold 1/3 interest for \$108,000.00, making Cash the highest selling bull ever produced in the productive Barstow Angus program.

Produced by a beautiful first calf heifer who weaned him at 113 ratio. Cash went on to earn a yearling ratio of 112 and scan with an adj. RE of 18.0 sq. in.!!

Cash is an exciting new calving ease sire that possesses a flawless genetic tabulation with a 64 lb. actual birth weight and strong growth, carcass, and \$B values.

Cash is a sensibly-sized bull that is massive in his design with incredible body volume and shape, thickness, and muscle mass throughout.

Cash will be one of the most heavily used new A.I. and flush sires of the 2012 breeding season.

VAR Rocky AMAN16160601

AM and NH Free

Rocky was the \$21,000.00 high selling Lot 1 bull of the 2009 Vollmer Bull Sale, and was a featured member of Vollmer's popular Pen of Three at the 2009 National Western.

Rocky's dam is a proven producer who was also the mother of the Lot 1 bull in Vermilion's 2008 Bull Sale. She has weaning ratio of 115 on 7 head!

Considered by visitors to the ranch to be one of the most eye appealing and intriguing young bulls in the WK Herd Sire battery.

FRESH GENETICS!!! Rocky offers a predictable, yet outcross pedigree that contains no New Design 036 or Precision.

Rocky exhibited tremendous fertility by freezing high quality semen at only 11 months of age!
