WELCOME TO OUR 2015 FEMALE SALE...

Welcome to our second genetic opportunity sale! We are pleased to have the Sickler family from Prairie Hills Gelbvieh joining us this year and feel that our programs and breeding philosophies complement one another very well and that our combined offering will truly have something that will fit every program out there.

When my wife Barb and I sold our main cow herd two years ago, we retained 15 choice lots to implement into an extensive embryo transfer program. Our goal was not to rebuild the actual number of our cow herd, but to produce superior genetics as quickly as possible within a recipient herd. This gives us the ability to run a smaller cow herd, while maintaining superior genetics that will excel within all aspects of the industry. The females offered in this sale are the direct result of that goal and are the first offering from those elite donor cows.

We have once again decided to put everything out on the table and let you decide on 10 of the lots in the sale. Meaning we will offer 10 Choice lots where you get to have first pick, with one heifer going to the buyer and the other female to be retained in our herd for future embryo production. Many of these lots are full ET sisters. We are offering all of the top replacement heifers in our herd, holding nothing back. We would like to retain the right to one flush at our expense, and at the convenience of the buyer, on all lots sold in the sale, unless stated otherwise within the footnote. Please feel free to give us a call or stop by the ranch at anytime to discuss or view the sale offering. We are looking forward to seeing you on November 7th.

THANK YOU,

Jim & Barb Beastrom

On behalf of Prairie Hills Gelbvieh, we'd like to welcome everyone to our first female sale. A big "Thank You" to everyone at Beastrom Ranch for inviting us to be a part of this big event. We started talking about partnering on a sale over a year ago and it's great to finally see it come together. We've known Jim and his family since we got into the Gelbvieh breed 30 years ago, and it's always fun to work with good friends.

We began our cowherd expansion in 2009 when Klint and Maralee returned to the ranch. We currently calve 125 purebred females each year, as well as implanting around 40 embryos per year. Since we run at maximum capacity, there is incredible pressure on every female to perform every year. This has opened the door for us to offer females that normally would not be available for sale.

As you look through the catalog, you'll notice quite a few females are outcross breeding to many of the popular bloodlines in the Gelbvieh breed. Due to the way our pastures are situated, we are unable to do any AI breeding, so all females are pasture exposed to bulls owned by PHG. This makes bull selection increasingly difficult, but it means that these are some of the only daughters that will be offered carrying these genetics. There are cows that have been part of our donor pen, cows that should be donors, bred heifers, show prospects, and future Dams of Merit in this offering.

Thanks again for your interest in our program. If you have any questions as you read through the catalog, please don't hesitate to give Klint or Galen a call and we'd be happy to answer any questions you might have. We look forward to seeing everyone in Pierre in November!

THANK YOU,

Galen & Marcia Sickler
Klint, Maralee, Kylee & Emerson Sickler

NOVEMBER 7TH • BEASTROM RANCH

THE SALE WILL BE HELD AT BEASTROM RANCH IN PIERRE, SD
20453 CENDAK ROAD, PIERRE, SD 57501

SALE LOCATION DIRECTIONS:

From West: 1.4 miles east of Triple M Truck Stop on Highway 14/83, then turn north on Cendak Road for 0.5 miles.
From East: 11.9 miles west of Highway 14/83 junction west of Blunt, then turn north just after mile marker 235 on Cendak Road for 0.5 miles.

ACCOMMODATIONS:

Ramkota Inn
Pierre, SD
605-224-6877
Livestock trailer accessible.

PRE-SALE SOCIAL:

Join us Friday evening, November 6, for a pre-sale social and viewing of the cattle at the Beastrom ranch. Dinner and beverages will be served.

SUPPLEMENT SHEET

All weights, catalog corrections, and other supplemental material will be posted to the PHG and Beastrom websites the week of the sale. A supplement sheet will be available sale day.

VIEWING OF SALE CATTLE

Females are available for viewing any time prior to the sale at the respective ranches. Cattle will be ready for viewing by 9AM on sale day. Videos of all lots will be available on the PHG, Beastrom Ranch, and DVAuction websites approximately 2 weeks before the sale.

ONLINE BIDDING

The sale will be conducted with a live auction, however, the sale cattle will not be run through the ring. They will be shown on three large video screens during the sale. Absentee bidders who wish to utilize the Internet may bid online at www.dvauction.com. Please register online at least 24 hours prior to the sale. Call 402-474-5557 for technical support.

TERMS AND CONDITIONS

Terms are check or cash, unless prior arrangements have been made before the sale. All cattle sell under the standard terms and conditions recommended by the American Gelbvieh Association. A copy of the terms and conditions may be obtained from AGA, Prairie Hills Gelbvieh or Beastrom Ranch.

REGISTRATION PAPERS

All registration papers on the animals selling are in order and will be transferred to the new owner. Papers will be mailed by the AGA and should be to the new owner in 30-45 days.

EPDS

All EPDs are provided by the American Gelbvieh Association and are current at printing of the sale book.

LIABILITY

All persons attending the sale do so at their own risk. Prairie Hills Gelbvieh and/or Beastrom Ranch assume no liability for accidents, theft or damages occurring at the sale facility.

VIDEO AUCTION SALE PROCEDURE

All animals selling will be penned at the sale facility. The auction will be conducted inside the sale barn at Beastrom Ranch. A video of each sale animal will be played on large screen displays as the respective animal sells. Cattle will not come into the sale ring. Please arrive early to view the sale offering.

DELIVERY

All buyers are responsible for the delivery of sale purchases. Trucking for hire will be available sale day.

INSURANCE

Klint Sickler will be available sale day to assist you with your insurance needs.

SIGHT UNSEEN POLICY:

We will guarantee the complete satisfaction of all sale lots purchased sight unseen. All bids will be handled with the highest appropriateness and confidentiality.

HEALTH INFORMATION

All cattle sell with a valid health certificate that will allow shipment anywhere in the continental United States. All females have received all appropriate vaccinations and any applicable boosters. All animals have also received Ivomec pour-on prior to sale day.

INTERNATIONAL SALES

Prairie Hills Gelbvieh and Beastrom Ranch are experienced in transporting animals across the Canadian border and will assist in that transaction. All fees associated with that (brokerage, health testing, etc) are the responsibility of the buyer.

BEA 445B ET is an ET daughter out of BEA 4022P (a full sister to BEA Johnny Walker) and Var Rocky, this female is very long and feminine fronted, long spined, wide based female that moves with fluidity and ease. She is deep sided and powerful. BEA 445B ET is safe to her AI date (5/10/2015) bred to BABR Dynamic 4260B, who was the alternate bull in our 2015 Reserve National Champion Balancer Pen of Three and very popular herd bull prospect on sale day this past February. The BEA 4022P daughters are powerful cows in the making and offer consistency and performance; you see the BEA 4022P cow in the pedigree of several lots in this sale offering. (Lot 1,2A,2B, 3, 4 and 5B).

BEA 5108C ET is a full sister to lot 2B and we could not decide which of these heifers we liked more so we decided to offer choice. 2A is very long fronted and deep sided; she offers an overwhelming amount of volume and balance. This is a true donor in the making that combines eye appeal and power and has proven pedigree; VAR Rocky daughters are easy fleshing big middled and very maternal.

BEA 5105C ET a full sister to lot 2A and offers the same balance and volume as her two ET sisters. This female has brood cow written all over her. She is long spined, big topped and feminine made and offers the same performance and balance of her donor dam and will surely follow in her footsteps. These ET sisters are hard to let go of and are the type you could build a program around and are an outcross to most pedigrees in the Gelbvieh breed.

BMB 433B is a very exciting donor cow prospect, loaded with volume, rib shape and added softness. She is sound and moves with ease. Her dam, BMB 7060T is a natural daughter of BEA 4022P and rising to the top of our purebred side of the herd, she consistently has cattle that are broody and well balanced. BEA 433B is an outcross to most pedigrees due to the fact we do not offer many females from this cow family at auction and is sired by SAV Best interest, a powerful Schaff raised AI herd sire. She is safe to her AI date of 5/10/2015 to BABR Secret Brand, this mating is sure to be a good one. Secret Brand cattle are soft bodied, attractive and made to grow, we can't get enough of his daughters due to their overall balance and fleshing ability combined with their attractive look.

BEA 5109C is a really exciting female. She is out of BMB 0009X, who will be on our list to flush this spring. She is a really neat made BA75 cow that has been proving herself year after year. She had a very powerful Secret Brand sired bull in our 2015 bull sale that was popular among our commercial customers due to his thickness, muscle mass, performance and overall balance. 5109C is extended and feminine fronted combined with volume and the ability to move with ease. She is a granddaughter of BEA 4022P and a paternal sister to lots 1, 2A and 2B. This is a unique made female with proven genetics that possesses a great future no matter where she ends up. Sells as a choice lot with 5B.

BEA 5138C is a maternal sister to lot 3, is a granddaughter of BEA 4022P and has all the right pieces to become a great producer. She is extra long spined, big topped and long fronted. She offers thickness, volume and balance, along with a strong maternal pedigree from both the top and bottom sides. Sired by BABR Branded Man 3400A, an exciting herd sire that is proving himself very quickly, his bulls and heifers combine a low birth weight and big weaning weights. They have extra length and are square made; half of the bulls we selected to possibly be in our NWSS Pen Bull string are sired by Branded Man. Half sisters sell as lots 14, 15 and 16.

BEA 5143C offers a ton of rib shape, volume and fleshing ability combined with soundness and a feminine attractive look. She is a female that you can do anything with. Her dam BEA 9040W will also be on the list of donors this year and is one that comes from one of the most consistent and productive cow families we have ever had. BEA 9040W's dam maternal brother was our entry in the 2015 Breeders Choice Balancer Futurity runner up and member of our Reserve National Champion Balancer Pen of Three. BEA 5143C's grand dam BEA 7026T is also a maternal sister to BEA 8028U who was purchased in our female sale 2 years ago by Prairie Hills Gelbvieh and is the mother to BEA Sand Stone 300A, the sire to lots 18A, 18B, 19A, 19B and 21.

BEA 416B is a moderate, stout made bred female who's dam is a daughter of BEA 7060T, the dam of lots 3 and 4 and maternal sister to lots 1, 2A and 2B. I cannot say enough good things about this cow family. 416B is a wide topped, stout made female that is moderate, sound and moves with ease. She is well balanced and has plenty of eye appeal. Her sire BABR 2105Z is a really powerful herd bull we retained a semen interest in. The two sons we sold in our 2015 sale were two of our higher selling bulls and this is the only daughter we had that calving season and she is a good one. She is safe to her AI date of 5/10/2015 bred to BABR Dynamic.

BEA 5111C is another BABR 2105Z daughter and full ET sister to lot 8B. BEA 9060W is one of the most powerful cows this ranch has had. She consistently raises high performance bulls and females and these two full ET sisters are no exception. 5111C is feminine, thick and soft made. She is sound, easy fleshing and combines performance, pedigree and eye appeal. BEA 9060W herself ranks in the top 4% for WW, the top 3% for YW, the top 10% for MK, the top 2% for TM and CW. These daughters are not easy to let go of and offer a different pedigree and versatility. Don't miss them on sale day. Paternal sisters sell as lots 5A and 6.

BEA 452B is a well made red hided female that is deep sided, long spined and well balanced. She is sired by Bar GT Crossfire, who is the sire of BABR 2105Z (sire to lots 5B, 6, 8A and 8B). Crossfire adds length of spine and skeletal stoutness along with added carcass value and consistently raises cattle with growth and performance. On the cow side this heifer goes back to Miss Black Ice B31 who was one of the matriarchs of our program. She sells bred to either BABR 3407A (Angus herd sire) or AGCG Black Genesis 403B.

BEA 5102C is the other half of this exciting lot; she has added performance, depth of rib and is a true brood cow in the making. The donor dam to these heifers is one of the nicest looking red females we have owned and is still raising cattle that are relevant in today's ever changing industry. 3050N is a paternal sister to the grand dam of lot 22 (BEA Lola 5039R). Good luck choosing between these two great females.

BEA 5110C is the first offspring to sell out of our outcross red herd sire BVLK A314. This is one of the easiest fleshing bulls we have ever owned combined with soundness and muscle mass; he has been a home run. This heifer calf is going to be a deep sided soft middle female that is sound and will continue to grow. Her dam BEA 0038X is a maternal sister to Lots 9A and 9B.

BEA 463B is another attractive made bred heifer; she is long fronted, big topped and well balanced. This heifer is sired by another ET brother to BEA Passion 063X and offers the same performance, thickness and growth that his littermates do. These bulls are also full brothers to BEA Cindy Lou Who 0001X, who is the dam to the high selling and lead off bull in our 2015 Reserve National Champion Balancer Pen of Three. There is a lot of cow power in this heifer's pedigree; her dam BEA 9074W is a paternal sister to BEA 9072W (the high selling lot in our first female sale and the dam of BEA Closer who is the sire to lots 9A and 9B). She sells safe to her AI date 5/10/2015 to BABR Cartwright 003X.

11	-0.1	84	122	24	66	12	4	-0.48	41	0.61	0.05	-0.04	82.27

This is a very unique opportunity to own some exciting new genetics. BEA 5103C is one of the softest made, deepest sided females I have ever seen, combined with thickness, eye appeal and the ability to move freely. This is a female that we feel will work in any program. Her dam DLW 321A was purchased at "The Chosen Few" sale and she was one of the most talked about females at the NWSS that year. We placed her in IVF as an open heifer; we had 4 calves born in 2015 including her natural calf and they are all impressive out of multiple sires. 5103C was the only daughter out of these matings and we truly feel that this female will be going places. The consistency of her dam and the added thickness, length and performance from her sire make this female one to watch. Retaining 1/2 embryo interest.

BEA 5144C is the other half of this choice lot and these two heifers are so similar in phenotype it will be hard to decide which one to choose. She is angular, big middle, thick made and sound, with added length in her spine and hip. Sired by BEA Common Sense 200Z who was a past sale favorite and ET son of the 2007 National Champion Gelbvieh Female Bar GT Hepburn who ads maturity, length and balance to his offspring. These heifers are very versatile with a big future.

BEA 417B is another daughter of BEA Common Sense 200Z and is a perfect example of what is in store for Lots 24A and 24B. 417B is one of the most well balanced females in the offering; she covers her track with a big foot, has depth of chest floor and is soft sided and thick made. Her mother is a full ET sister to the dam of lot 30B and I think you will see the consistency in cow family. She sells bred pasture exposed to BEA 3407A or ACGC Black Genesis 403B.

BEA 5114C is a fancy made heifer that has an abundance of rib shape combined with an angular skeletal structure and clean lines. This heifer just gets better with time. Sired by EXAR Pay Stub, who is also the sire of BEA 8212U (resident donor cow at the ranch), BABR 7062T (the dam of BABR Branded Man 3400Z who is the sire to lots 4, 14, 15 and 16), BABR 7061T (2009 National Champion Balancer female that will see in the pedigree of lots 26 and 32) and BMB 8213U (the dam of lot 15). Pay Stub Daughters are unarguably some of the most consistent and powerfully producing cows we have worked with.

BEA 5135C is a full ET sister to lot 27A and offers the same thickness, depth of body and eye appeal as her sister. These heifers are out of MCFG 77M, who is a purebred female we purchased from Middle Creek Farm, She has consistently produced sons and daughters that have made their mark in many commercial herds and registered herds. BEA 0005X is a maternal sister to lots 27A and 27B. We feel that this breeding combination is a special one.

BEA 5139C is the only Secret Brand sired heifer in the offering and she will not disappoint you. She is well balanced with a soft look and she will continue to get better with age. Secret Brand sired females are as well liked at this ranch as the Pay Stub Bred females. They are thick made soggy females that have a ton of natural fleshing ability; they are consistent in type and kind and will work well in any breeding situation.

This lot is a rare opportunity to purchase purebred genetics that cannot be reproduced. BEA 1027L is deceased and these (along with the dam of lot 30A and 33) are the only remaining daughters from this cow line. BEA 5106C is a long bodied thick made female that offers balance and consistency along with correctness of lines and volume. This is a female has a pedigree with the consistency and longevity to be a great producer. Retaining 1/2 embryo interest. (BEA Miranda 4014P is a maternal sister to lots 29A & 29B, a full sister to the dam of lot 30A and grand dam of lot 33).

A full ET sister to lot 29A and maternal sister to the Dam of lot 30A who is long spined and deep sided combined with thickness and fleshing ability. These heifers are sired by BABR Gentleman Jack who was one of the most popular bulls we have raised to date. We retained semen interest in this bull to use within our own herd, his sons are thick, easy fleshing and high performing and his daughters are angular, soft sided with a perfect teat and udder structure. Retaining 1/2 embryo interest.

This is a heifer that hit us hard at an early age, she is one of the longest bodied females in the offering and she still maintains the ability to hit her track with fluidity and ease. She long and angular fronted with a thick and strong top line. She is soft in her appearance and is sired by SGRI Mission who is a pioneer son we purchased from Steve Schroeder and we are very happy with the performance of his calf crop. His daughters are consistently long, thick and attractive made females that started with a low birth and are finishing with big performance. Paternal sisters sell as lots 30B, 31, 32 & 33 and her dam is a maternal sister to lots 29A & 29B and is also a full sister to the grand dam of lot 33 (reference photo to lot 29A BEA Miranda 4014P).

This is another daughter of SGRI Mission that has big potential as a producer due to her highly maternal look and pedigree. She is very long bodied and thick made; she offers a stout skeletal make up with a big middle and added muscle mass tied into a feminine package. Her dam is a full ET sister to the dam of lot 25 and they are also maternal sisters to BEA 131Y who is a bull we retained a semen interest in and are using extensively in our herd; he offers carcass value, thickness, growth, structure and is a son of VAR Rocky who is the sire to lots 1, 2A and 2B.

We purchased this awesome donor female as the pick of Beaström's herd at the National Sale. She's best known as the dam of AI sire JRI Top Grid, but she's been writing her own chapter as a PHG donor. She posts a 104 weaning ratio and a 101 yearling on 11 calves. She's also posted a 101 REA and a 110 IMF ratio. Cool fronted, wide topped, with great hair, she offers a wealth of options for breeding. Front pasture quality that you can put to work. She sells bred to DDGR Yukon 172Z for a 3/10/2016 black purebred bull calf.

If there was one cow on the place that we should have flushed, it is 642S. Awesome fronted, deep ribbed, wide topped – she's a real producer. One of her best daughters was high selling female at the 2012 Canadian National Sale to Twisted T Gelbvieh. She has gone on to be one of the leading foundation females in their emerging program. As a 75% female, you have the option of breeding her for Purebreds, or Balancers, and she'll click either direction. We've always wanted to work her into the donor program, but there's just too many eggs and not enough recipis. Flush her or breed her, you're going to have to look hard to find one this proven with this much unrealized potential. Dam of Merit in 2012, 2013. Sells bred to DDGR Yukon 172Z for a 3/21/2016 black purebred bull calf.

We purchased CVV 58P out of the VanderVorst dispersion in 2010 with the intent of adding her to our donor lineup. Her first ET calves arrived in 2014 and were some of the most appreciated females at our open house this summer. Females out of 58P are clean fronted, deep bodied and are consistently top producers. Her bull calves are long sided, deep ribbed, with an extra dose of eye appeal. She's an outcross to nearly every popular blood line in the breed and is in the top 1% for many EPD traits – her breeding options are unlimited! We had her on the schedule to flush again, but have decided to spread the wealth. She sells open and ready to flush!

5038R came to us from the 2013 Beastrom Dispersion. Her first bull calf sold for \$7000 in our 2015 sale, and this year's calf is an absolute scale buster! We had intended on putting her into embryo production, but when it came time to choose some top end females for this female, we kept circling back to 5038R. With her pedigree you can flush her any direction you like. Put her into production and let the checks roll in! Sells open and ready to flush..

Annie Oakley stems from one of the first females that Clint purchased when he was establishing his own cow herd. R03 has gone on to produce 2 bull futurity candidates, numerous females in production, and her 2015 heifer calf in a candidate for the show string. She's one of those girls that seems to click with anything. She sells bred to RWG Yikes 1512 for a 4/14/2016 calf. Ultrasound was unable to determine fetal sex.

PHG Z21 is a unique breeding piece. Her dam, COL Miss Pegasus 84S is also the dam of PHG Ultraviolet U02 – the mother of the 2013 Breeders Choice Futurity winner PHG Rockin the Bakken Z17. Her sire, COLB Mr Xavier X812 has been making a name for himself through out the US and Canada, with sons and daughters topping numerous sales. She boasts a very balanced EPD profile that lends itself to countless breeding options. PHG Z21 sells bred to PHG Roughneck Z23 for a 4/17/2016 black purebred calf. Ultrasound was unable to confirm sex.

We've only sold one Payday daughter, and she was the high selling female at the 2012 Canadian National sale to Twisted T Gelbvieh. Trevor caught Klint at a moment of weakness in 2012, and this is your chance to catch Galen at his moment of weakness. C74 comes from a real no-miss cow who we've considered as a flush candidate. Opportunity is knocking, don't miss this chance!

C06 is one of the first Jackson daughters offered for auction. We purchased her dam from the Kicking Horse herd, after she was named division champion at the NILE in Billings. 063X is quickly becoming one of the lead red cows in the PHG herd, and this young heifer is a great example of the maternal power in this cow family. Great foundation genetics with countless breeding options.

Here's a don't miss opportunity in C12. This is the first, and possibly only daughter of Super Flex to be offered at auction. We purchased Flex as one of the top sellers from J&K Gelbvieh and used him on heifers the first year – all calving unassisted. We lost Flex to an injury last summer, so this is his only calf crop available. Lots of local breeding is evident through the pedigree – Beethoven, Hot Fudge, and The Judge need no introduction. Lots of maternal power top and bottom – great foundation female potential!

AGA RECOMMENDED TERMS AND CONDITIONS FOR PRAIRIE HILLS GELBIEH & BEASTROM RANCH SALE

TERMS: Terms of sale are cash or check unless satisfactory credit arrangements have been made by the seller previous to the sale of any animal so affected.

BIDDING: All animals sell to the highest bidder. Any disputes or challenges regarding bids shall be settled by the auctioneer and his decision shall be final. Mailed or telephoned bids may be forwarded to the sale management or auctioneer and will be handled with strictest confidence. Prior arrangements for telephone bids at sale time must be made with sales management or the auctioneer.

There are no warranties, expressed or implied, by either the auctioneer or seller, except as set forth herein, as to the merchantability or fitness for any particular purpose of any animal offered in this sale. The right to bid or the right to reject the final bid, if done before the hammer falls, is reserved for the seller.

INSURANCE OF PURCHASES AND RISK: All animals are at the owner's risk and become the property of the purchaser when declared sold by the auctioneer. Arrangements have been made to have insurance available when making settlement.

ACCIDENTS: All precautions possible will be taken to protect the safety of buyers and others attending the sale. Nevertheless, no responsibility will be assumed by the auctioneer, sales management or the host farm in the event of accidents or of loss or damage of property.

HEALTH TESTS: All animals have been tested and found negative for brucellosis and tuberculosis or originate from a free state. The sale veterinarian will assist buyers on health status for specific states and testing for anaplasmosis and blue tongue if this is required for export to Canada.

BREEDING GUARANTEES AND DEFINITIONS

FEMALES: Females are guaranteed to be breeders, with the exception of female calves sold at side of dam, injury or disease occurring after time of sale, gross negligence or willful misconduct on the part of the purchaser, females used in ovum transplant after time of sale, females shown competitively after time of sale, and cows with calf at side.

Cows represented as being "safe in calf" will have been examined by a licensed veterinarian and are so guaranteed. They are considered breeders without further guarantee. Females with a "due to calve" date in the remarks columns are considered safe in calf. A bred female is a female known to have been served by a bull either by natural breeding or artificial insemination, but it does not necessarily mean that the female is safe in calf to that service. A pasture-bred female is a female that has been exposed for the time stated, but it does not necessarily mean that this female is safe in calf to that bull. An open heifer is a virgin heifer that has never been exposed to a bull either through natural service or artificial insemination. An open cow is a cow that has not been exposed to a bull either through natural service or artificial insemination since the birth of her last calf. Calves sold off their dams (split pairs) shall carry the full breeding guarantee.

MALES: Bulls are guaranteed to be breeders (defined as ability to settle healthy cows by 18 months of age) with the exception of bull calves sold at the side of dam, injury or disease occurring to the animal after time of sale, and gross negligence or willful misconduct on the part of the purchaser. Any guarantees with respect to ability to freeze semen shall be made by separate agreement between the buyer and seller.

ADJUSTMENTS: The following adjustments do not preclude the right of buyer and seller to mutually agree upon other terms and conditions for settlement of any dispute.

All claims for adjustment or refund must be made in writing either within six (6) months from the time of sale or not later than six (6) months after the animal reaches eighteen (18) months of age, whichever occurs first, with the exception of claims involving misrepresentation of service sire or as otherwise provided herein.

If a female is sold as "safe in calf" to a given sire or sires on a specified date or dates and proves not to be represented, the buyer is entitled to a refund of the purchase price from the seller upon return of the animal to the farm of the seller at the seller's expense. In the event an animal is claimed to be a nonbreeder, the animal may be returned to the farm of the seller, at the buyer's expense, if in good physical condition and the return is in compliance with the health requirements of the state where purchased. The seller shall be entitled a six (6) month trial period in which to prove the animal is a breeder, the seller shall, at his option, replace the animal with another of equal value or refund the purchase price. Either option shall be deemed full satisfaction and settlement. Any animal returned will be at the purchaser's risk. No guarantee is given concerning a pregnant female's gestation period or calf's condition. The seller is not responsible for damage caused by foreign bodies after the animal has been sold nor for sickness not apparent at sale time.

If a female is sold as "open" and proves to be with calf at time of sale and examined pregnant within sixty (60) days after sale, the buyer may return the animal to the farm of seller prior to calving for a refund of the full purchase price or for another mutually acceptable adjustment. It shall be the obligation of the seller to bear all expenses incurred for transportation of the animal in question to the farm of the seller. Any adjustment provided herein, if selected, shall absolve the seller from further liability.

DEFINITIONS AND GUARANTEES

AGA REGISTRATIONS AND TRANSFERS: Each animal which is cataloged, offered and sold as a registered animal has a certificate of registry available at time of sale. When an animal is sold as “eligible for registry” or “registry applied for,” the seller shall be responsible for obtaining the certificate of registry and for the proper transfer of the certificate to the purchaser including full payment of transfer fees.

PURCHASER’S RISK: Each animal becomes the property of and therefore is also the risk of the purchaser as soon as it is sold, except it shall be the obligation of the seller to see that animals are fed and cared for free of charge to the buyer until unloaded for shipment or until the expiration of forty-eight (48) hours after the sale, whichever occurs first.

ANNOUNCEMENTS: Any errors or changes in information contained in the catalog will be announced from the auction block. Such announcements shall take precedence over information contained herein. The sale will be tape recorded for future reference.

RIGHTS AND OBLIGATIONS: The above terms and conditions of sale constitute a contract between the buyer and seller of each animal and shall be equally binding on both. Animals resold following purchase in this sale shall constitute a separate transaction and the rights and obligations of the parties connected thereto are not covered by the above terms and conditions of this sale. Neither the host farm, auctioneers, nor any other person connected with the management or conduct of this sale assumes any liability, legal or otherwise, except as set forth above.

HOMOZYGOUS BLACK HOMOZYGOUS POLLED WARRANTY

All warranties regarding cattle being homozygous black or homozygous polled, or both, are agreements between the original buyer and seller and extend only to the original buyer. The liability of the seller shall not exceed the amount of the original purchase price and the seller must be notified in writing within 24 months following the date of purchase for this warranty to be enforceable.

In the event an animal sold as homozygous black or homozygous polled is determined to be heterozygous for the warranted trait, the seller will make satisfactory replacement or refund the purchase price within a reasonable time. The seller must have the opportunity to inspect the calf in question and, at his cost, blood type or DNA test the calf and its parents and perform such other tests as necessary to confirm that the calf is heterozygous for the trait in question.
